

Communication

Date	2 July 2026
Team ID	xxxxxx
Project Name	AI-Powered Lead Generation System
Maximum Marks	1 Mark

Communication Plan – AI-Powered Lead Generation System

Effective communication was maintained throughout the development of the **AI-Powered Lead Generation System** to ensure smooth collaboration, proper task management, timely completion, and successful project delivery. Team members conducted regular meetings to discuss project progress, assign responsibilities, review completed tasks, and resolve technical challenges related to AI integration, lead scoring, and system development.

Frequent discussions with the project guide helped improve the system through valuable feedback, suggestions, and performance reviews. Communication tools such as **Google Meet, WhatsApp, GitHub, Microsoft Teams, and Google Docs** were used for team discussions, code sharing, documentation, progress tracking, and maintaining project records. This structured communication approach supported effective teamwork and successful completion of the project.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Team Standup Meeting	Daily	Google Meet / WhatsApp	All Team Members	Discuss daily progress, assign tasks, track development activities, and resolve technical issues.
2	Progress Update	Weekly	Google Meet / Microsoft Teams	Team Members & Project Guide	Review completed work, monitor project milestones, and plan upcoming activities.
3	Technical Discussion	As Needed	WhatsApp / GitHub / Direct Discussion	Development Team	Resolve coding issues, AI model challenges, data processing problems, and integration difficulties
4	Guide Review Meeting	Bi-Weekly	Google Meet	Team Members & Project Guide	Receive feedback, review project progress, and identify improvements for the system.
5	Documentation Review	Weekly	Google Docs / Microsoft Word	All Team Members	Prepare, update, and review project reports, technical documents, and submission materials.
6	Final Demo Rehearsal	Once	Google Meet / Classroom	All Team Members	Practice the project demonstration, presentation flow, and final submission process.

Communication Challenges & Resolutions:

S. No	Challenge Faced	Resolution / Action Taken
1	Selecting the most suitable Machine Learning model for accurate lead prediction and scoring..	Evaluated different ML approaches and selected an appropriate model based on prediction performance, accuracy, and project requirements.
2	Integrating the AI-based lead scoring system with the web application and automation workflow.	Tested model integration, verified data flow between modules, fixed configuration issues, and ensured smooth system execution.

3	Managing project tasks and coordinating development within the given timeline.	Conducted regular meetings, assigned specific responsibilities to team members, tracked progress, and resolved issues through effective collaboration.
