

Demonstration of Proposed Features

Date	2 July 2026
Team ID	XXXXXX
Project Name	AI-Powered Lead Generation System
Maximum Marks	1 Mark

Demonstration of Proposed Features:

S. No	Feature Name	Description	Status	Demonstrated	Remarks
1	Lead Input Interface	Allows users to enter customer details and lead-related information for analysis.	Implemented	Yes	Successfully accepts user input.
2	Data Preprocessing	Cleans, transforms, and prepares customer data before applying the Machine Learning model.	Implemented	Yes	Improves prediction accuracy.
3	Lead Prediction Model	Uses a trained Machine Learning model to analyze customer information and predict potential	Implemented	Yes	Provides accurate emotion classification
4	Lead Scoring & Qualification	Generates lead scores and identifies high-potential customers based on analyzed data.	Implemented	Yes	Delivers personalized recommendations.
5	Recommendation System	Provides AI-based recommendations to improve lead conversion and customer	Implemented	Yes	Successfully tested and deployed locally.

6	Web Application	Integrates the trained model into a Streamlit-based web application with an easy-to-use interface.	Implemented	Yes	Provides clear and user-friendly output.
7	Result Display & Analytics	Displays lead score, prediction results, customer insights, and recommendations clearly.	Implemented	Yes	

Feature Implementation Summary:

Metric	Value
Total Features Proposed	7
Total Features Implemented	7
Total Features Demonstrated	7
