

Project Demo Planning

Date	3 July 2026
Team ID	xxxxxx
Project Name	AI-Powered Lead Generation System
Maximum Marks	1 Mark

Project Demo Planning:

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce the project objectives, business problem, and the need for an AI-powered lead generation system.	2	Hemamalini Bora
2	Dataset & Data Preprocessing	Explain the customer/lead dataset, data preprocessing, feature selection, and preparation for model training.	3	Trivenisandhya Irla
3	Lead Prediction & Scoring Model	Demonstrate the Machine Learning model, lead prediction process, lead scoring, and evaluation results.	3	Chakri Kumar Gubbala
4	Web Application Demonstration	Demonstrate the Streamlit application, customer data input, lead prediction, lead scoring, and recommendations.	3	Naga Uday Bhaskar Erothu

5	Results & Performance Evaluation	Present prediction accuracy, evaluation metrics, model performance, and lead analysis results.	2	Kappala Salomi Vennela
6	Conclusion, Future Scope & Q&A	Summarize the project, discuss future enhancements, and answer questions from the evaluators.	10	All Team Members

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the business problem, project objectives, and the importance of AI-based lead generation and lead scoring.
2	Solution Overview	Describe the system architecture, emotion dataset, text preprocessing, BERT model, and Streamlit-based workflow.
3	Live Feature Demonstration	Demonstrate the application by entering sample text, detecting the user’s emotions, and displaying personalized learning recommendations.
4	Q&A Session	Discuss the project results, future scope, and answer questions from the evaluators.
