Project Name	AI-Powered Lead Generation System
Maximum Marks	2 Marks

Customer Journey Map:

The **Customer Journey Map for the AI-Powered Lead Generation System** represents the steps followed by sales and marketing professionals while using the system for lead generation and management. It highlights user actions, challenges, expectations, and experiences throughout the process. By understanding these interactions, the system improves lead identification, scoring, customer engagement, and decision-making through Artificial Intelligence and Machine Learning.

Customer Journey Map for AI-Powered Lead Generation System:

The **Customer Journey Map for the AI-Powered Lead Generation System** illustrates the complete journey of a user, beginning with accessing the application, entering customer details or lead-related information, and receiving lead analysis and prediction through the AI-based model. Based on the collected data, the system identifies potential leads, assigns lead scores, and provides recommendations to improve customer conversion. The map highlights the user's interactions, expectations, challenges, and experiences throughout the process, helping to create an intelligent, efficient, and user-friendly lead management platform that improves sales performance and supports better business decisions.
