

Data Flow Diagram

Date	27 June 2026
Team ID	xxxxxx
Project Name	AI-Powered Lead Generation System
Maximum Marks	2 Marks

Symbol	Name	Description
Oval / Rounded Shape	External Entity	A person or external system that sends or receives data from the system (e.g., Sales Executive, Marketing Team, Customer Database).
Rectangle with Numbered Header	Process	An activity that transforms incoming data into meaningful output (e.g., Lead Data Collection, Data Processing, Lead Scoring, AI-Based Recommendation)

Cylinder / Data Store	Data Store	A place where information is stored for future use (e.g., Customer Data, Lead History, Trained Machine Learning Model).
Labeled Arrow	Data Flow	The movement of data between external entities, processes, and data stores, labeled with the type of information being transferred (e.g., Customer Details, Lead Scores, AI Predictions, Recommendations).

Data Flow Diagram

A **Data Flow Diagram (DFD)** is a graphical representation of how data moves through a system, showing the flow of information between users, processes, external services, and data stores. In the **AI-Powered Lead Generation System**, the DFD illustrates how users enter customer details or lead-related information, which is validated and pre-processed by the system. The processed data is analyzed using Artificial Intelligence and Machine Learning models to identify potential leads, predict lead quality, and assign lead scores. The system then generates recommendations and insights to help sales teams prioritize prospects. Finally, the lead analysis, scores, and recommendations are displayed to the user, supporting efficient lead management and better decision-making.

DFD Symbol Legend

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
