

Empathy Map

Date	26 June 2026
Team ID	xxxxxx
Project Name	AI-Powered Lead Generation System
Maximum Marks	4 Marks

Empathy Map Canvas:

The **Empathy Map Canvas** for the **AI-Powered Lead Generation System** helps understand the needs, challenges, behaviors, and expectations of sales and marketing professionals while generating leads. Businesses want to identify potential customers, improve lead conversion rates, and make better sales decisions. However, they often face challenges such as spending too much time searching for leads, difficulty in identifying high-quality prospects, and uncertainty in prioritizing potential customers. They search for customer data, use marketing tools, and analyze sales information to improve their lead generation process. By understanding these needs and challenges, the system can use Artificial Intelligence and Machine Learning to identify, score, and recommend potential leads, making the sales process more efficient, accurate, and effective.

Empathy Map for Emotion Detection & Learning Support Engine:

The empathy map for the **AI-Powered Lead Generation System** focuses on understanding the experiences, challenges, and expectations of sales and marketing professionals during the lead generation process. Sales teams want to identify potential customers, improve lead conversion, and increase business growth. However, they may face challenges such as difficulty in finding quality leads, spending more time on manual lead research, and uncertainty in selecting the most valuable prospects. They use customer databases, marketing platforms, and sales tools to collect information and improve their lead generation strategies. Understanding these needs, behaviors, and challenges helps in developing an intelligent system that uses Artificial Intelligence and Machine Learning to identify, analyze, and score potential leads, providing accurate recommendations and improving sales efficiency and decision-making.
